E-mail

**1. What is your connection or interest in this case? \* For example, are you a customer of the Company that is the subject of this pending proceeding? (This section must be completed. Attach additional information if necessary.)**

I have been an SCE&G and Dominion customer since 1990 and added a solar power generating system to my home in 2018.

**2. Please give a concise statement of your protest. \* (This section must be completed. Attach additional information if necessary.)**

My wife and I decided to invest in our financial future and the world's environmental well-being by adding a solar power system to our home. This decision came with the financial strain of paying for the system and future financial risk of its removal and re-installation as part of any future roof replacement. It was expected to break even in 8-10 years. We are at year two of having solar power. If the break even point had been any longer, we would not have opted to "go solar". Any changes in the terms presented for net metering and compensation for excess energy produced that extend that break even timeframe is unreasonably harmful to anyone in our situation. If guidelines change for the worse, existing solar owners should be exempt. Up to this point, the utility company has experienced no risk, no uncompensated responsibility and receives our excess power at a reasonable rate. PSC should require Dominion to honor and continue to offer the original home solar power generation terms.

**3. Do you wish to make an appearance at a hearing in this proceeding, if scheduled, and offer sworn testimony? \***

No thank you, but we will be in attendance.
